

How to Embed Weave into a Webpage

To embed a Weave visualization on the DataHUB website into a webpage follow these steps:

1. Click on the icon “Embed This” which is located on the top right of every Data Story and Report.
Registered users will also find a similar button in the WeaveFiles section of your Portfolio.
2. After you click on the icon a small window will pop up.
3. Copy the code snippet.
4. Paste the code in between the <head> tags in your webpage.
