

Working with *i*-lists

Registered users of the HUB can use *i*lists to help organize indicators into manageable lists, save them, and visualize them later in WEAVE .

Getting to your *i*-lists:

You can create *i*-lists and manage your *i*-lists in your Portfolio.

To add indicators to your *i*-lists, you must search for indicators using the Keyword Indicator Search in the Data Catalog.

In the Data Catalog:

After you conduct a search and the results table populates, the *i*-list management bar will appear.

1. Select which *i*-list you want to view from the dropdown menu.

2. Click on View my *i*-list to see your list.

Adding indicators to your i-lists:

Adding indicators to your *i*-list is simple. Select the checkboxes next to the indicators in the search results table you want to add, and click “Add selected to *i*-list.”

To add the selected indicators to your *i*-list, click on **Add selected to *i*-list**.

Change the *i*-list you are adding to by selecting it from the dropdown menu. You may also choose to add to All *i*-lists in this

Selecting **Add to *i*-list** will only add the selected indicators on your current search results page to your *i*-list. If you are on page 2 when you click on **Add to *i*-list**, only selected indicators on page 2 will be added to your *i*-list.

Working in WEAVE:

i-lists allow you to easily access the indicators you are interested in. Creating an *i*-list will save you time working in WEAVE because you won't have to scroll through hundreds of indicators in the Attribute Selector.

Your *i*-list name(s)

Only data levels for which you have indicators in your *i*-list appear in the Attribute Selector.

The list of indicators available in the Attribute Selector is limited to those included on your *i*-list.
